a) To prevent mechanical damage

b) To reduce electrochemical corrosion

c) To improve coating adhesion

d) To eliminate moisture from surfaces

Correct answer: b) To reduce electrochemical corrosion

Such questions test basic comprehension and terminology familiarity.

- Application and Scenario-Based Questions

These questions present real-world situations where candidates must apply their knowledge:

During a pipeline cathodic protection survey, a technician observes a potential reading of -0.85 V vs. Cu/CuSO? reference electrode. Is this potential sufficient for adequate protection?

a) Yes, it indicates sufficient protection

b) No, it should be more negative

c) No, it is too negative

d) It is irrelevant to protection levels

Correct answer: a) Yes, it indicates sufficient protection

These questions evaluate practical decision-making skills.

- Standards and Procedures

Questions in this category test familiarity with industry standards and safety protocols:
